

# ZEISS Celldiscoverer 7

Automated Live Cell Microscopy

"Often in your life sciences research, the data you are after will only be revealed through multiple runs of experiments or complex assays. Automation and parallelization can be the only way to get there. Now, with ZEISS Celldiscoverer 7, you can combine the easy-to-use automation of a boxed microscope with the image quality and flexibility of a classic inverted research microscope."

OICE will host a seminar given by Dr. Gert Sonntag, Application Specialist at Carl Zeiss. He will introduce the new Celldiscoverer 7 Microscope.

## ZEISS Seminar Automated Live Cell Microscopy

Thursday, 23<sup>rd</sup> March  
11 a.m. (s.t.)

OICE  
Hartmannstr. 14  
Kussmaul Campus
