Dear all,

Here the hopefully final schedule for the move of OICE into Cauerstr. 3.

As of now!

**OICE will REMAIN open until Wednesday 9th of January 2019 till 6 p.m..**

Planned GenTech audit in the new building will be happen on 28<sup>th</sup> or 29<sup>th</sup> of January.

Due to restrictions set by the Federal Building Authority we are not allowed to start work before February 1<sup>st</sup> again.

**By now OICE will aim to be open again for research from Monday 4<sup>th</sup> of February.**

The OMERO server and your data will remain accessible throughout this transition.

We will switch to the new IT infrastructure once the move has been completed. This very likely only will see a downtime of one day which we will inform you about in due course.

PLEASE be aware that OICE will have new phone numbers in the new building, which we currently do not know.

**OICE staff will be available at the Kussmaul campus at least till January 30<sup>th</sup>.**

Hopefully we now can stick to this schedule.

Best wishes

Ralf Palmisano
